### RESUME

Recently graduated in Computer Science from UNISANTOS (2025), seeking my first professional opportunity in Information Technology. During my studies, I developed a solid foundation in Python, SQL, Excel, Power BI, and C, focusing on data analysis, programming logic, and the development of technological solutions. I led an independent data science project applied to the video game industry, using Natural Language Processing (NLP), clustering, and machine learning to generate business insights. Passionate about technology, innovation, and problem-solving, I seek to contribute to projects that combine data analysis, automation, and software development.

### SKILLS

- Advanced Excel, Intermediate Power BI, Microsoft Office, Python, SQL, C.
- Teamwork, Communication, Creativity, Organization.

### EDUCATION

Bachelor's Degree in Computer Science — UNISANTOS (Universidade Católica de Santos) — Completed in June 2025
